

REISSUE DECLARATION AND POWER OF ATTORNEY

J. MICHAEL TEETS and JON W. TEETS declare:

We are each citizens of the United States of America.

J. Michael Teets is a resident of Hobe Sound, Florida, County of Martin, whose post office address is 5225 Inkwood Drive, Hobe Sound, Florida 33455.

Jon W. Teets is a resident of Scottsdale, Arizona, County of Maricopa, whose post office address is 7556 E. Sweetwater Avenue, Scottsdale, Arizona 85260.

We believe ourselves to be the original, first and joint inventors of the subject matter which is described and claimed in Letters Patent No. 6,314,717, granted on November 13, 2001 and for which invention we solicit a reissue patent on the invention for which the specification and a Preliminary Amendment are attached hereto.

We have reviewed and understand the contents of the above identified specification, including the drawings, specification and claims, as amended by any amendment referred to above.

We do not know and do not believe that the same was ever known or used in the United States before our invention thereof.

We acknowledge our duty to disclose information of which we are aware which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations, §1.56.

We verily believe U.S. Patent No. 6,314,717 (hereinafter "the patent") to be wholly or partly inoperative or invalid by reason of the patentees claiming less than we had a right to claim in the patent. These errors, which are being corrected up to the time of the filing of this application, arose without any deceptive intent on the part of the Applicants. We solicit a reissue patent to correct these errors.

All of these errors are corrected by amendment to the specification and drawings in this reissue application.

At least one error upon which reissue is based is described below.

Specifically, during a recent review of the scope of the patent, it was discovered that the legal scope of protection afforded by the claims of the patent was not as great as it could have been if additional method claims associated with the apparatus claims were included in the original application.

Furthermore, during a recent review of the scope of the patent, it was discovered that the legal scope of protection afforded by the claims of the patent was not as great as it could

{W0090341.1}

have been if unnecessary features and details of the invention had not been included in the claims. In particular, claim 1 includes features of the fuel metering valve which unnecessarily narrow the claim.

We declare further that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

We hereby appoint William H. Logsdon, Registration No. 22,132; Russell D. Orkin, Registration No. 25,363; David C. Hanson, Registration No. 23,024; Frederick B.
